\* indicates unaccredited analysis.

Method specification	
1	Determination of adsorbable organically bound halogens (AOX) according to method based on CSN EN ISO 9582.
2	Spectrophotometric determination of phosphate according to method based on CSN EN ISO 6878. The method includes filtration of turbid samples.
3	Determination of NO <sub>3</sub> nitrate using ion chromatography according to CSN ISO 10304-1 and CSN EN 12506. The method includes filtration of turbid samples.
4	Spectrophotometric determination of ammonium NH <sub>4</sub> according to method based on CSN EN ISO 11732, CSN EN ISO 13395, CSN EN 13370 and CSN EN 12506. The method includes filtration of turbid samples.
5	Package OV-20B Determination of non-polar aliphatics, total extractable aliphatics and total extractable aromatics. The measurement is performed with (IR)-spectrometric method.
6	Package V-3B Determination of metals after microwave digestion with HNO <sub>3</sub> . The measurement was carried out according to EPA-methods 200.7 (ICP-AES) and 200.8 (ICP-SFMS). The determination of Hg was carried out with AFS according to SS-EN ISO 17852:2008.  Special information for added metals to the package: W; the sample has been digested with HNO <sub>3</sub> and HF. Ag; the sample has been digested with HCl.

H	The determination is performed using ICP-SFMS The analysis is provided by ALS Scandinavia AB, Aurorum 10, 977 75 Luleå, Sweden, which is a testing laboratory, accredited by the Swedish accreditation body SWEDAC (Reg No. 2030).
I	The analysis is provided by ALS Laboratory Group, Na Harčě 9/336, 190 00, Prag 9, Czech Republic, which is a testing laboratory, accredited by the Czech accreditation body CAI (Reg.No 1163) CAI is a signatory to a MLA within EA, the same LA to which the Swedish accreditation body SWEDAC is also a signatory. The laboratories are located in, Prague, Na Harčě 9/336, 190 00, Praha 9, Česka Lipa, Bendlova 168777, 470 03 Česka Lipa, Pardubice, V Ráji 908, 530 02 Pardubice  Contact the laboratory for further information.

The uncertainty is given as extended uncertainty (according to the definition in "Guide to the Expression of Uncertainty in Measurement", ISO, Geneva, Switzerland 1993) calculated with a coverage factor of 2, which gives a confidence level of approximately 95%.

The uncertainty from subcontractors is often given as extended uncertainty calculated with a coverage factor of 2. Contact the laboratory for further information.
