Subject: Permit to fly a drone in Fjallabak

The Environment Agency of Iceland has received an application from David Murray, dated, 7th June 2024, for photography with a drone in Hveradalir (Kerlingafjöll) and Landmannalaugar (Fjallabak).

Kerlingarfjöll is protected as an area of landscape, cf. Regulation no. 822/2020. Disturbance to geological formations, landscape, hot springs, other springs and ecosystems in hot springs in the protected area is prohibited. Permission must be obtained from the Environment Agency of Iceland for organized events and projects that need facilities, labour force or use of equipment within the protected area such as filming, at events and ceremonies.

Fjallabak is protected as a nature reserve, cf. regulation no. 354/1979. Construction work, extraction of minerals, disturbance to geological formations, vegetation and wild animal life in the protected area is prohibited. The use of unmanned aircraft (drones) within the nature reserve from June 15th - September 15th is subject to a permit from the Environment Agency of Iceland.

Description of the project:

The applicant requests to use drone to photograph scenery and family within Kerlingafjöll and Fjallabak between 10th and 17th of July 2024. He will stay within marked paths and stay below 120m elevation. Duration of flight is less than an hour on each location.

Impact assessment:

The Environment Agency of Iceland considers the project to be minimal and not likely to have negative impact on the environment. The droneflight might have negative impact on other visitors experience in the site but if conditions of the permit are followed the impact can be reduced.

Conclusions and conditions:

After revision of the application and regulations for the sites it is concluded that no permission is needed to fly a drone in at Kerlingafjöll in the period requested if the flight does not disturb wildlife and other visitors experience.

The Environment Agency of Iceland hereby grants David Murray permission on its behalf to photograph with a drone within Fjallabak as described above, on the dates in the application on the following conditions.

- Keep this letter with you on site during the project. The permit conditions should be introduced to the staff of the project before work begins.
- The applicant shall inform rangers in the area about their arrival and departure. This is to be done 24 hours before entering the area and again before leaving it.
- If the project dates or description changes the Environment Agency shall be notified as soon as possible.
- Applicant should always stay on authorized paths/tracks/roads.
- The applicant must follow rules of conduct that apply to the area.
- If any complications occur during the project, please contact the ranger or the Environment Agency of Iceland, tel. +354 591 2000.
- All disturbance to animals and wildlife is strictly prohibited.
- Off-road driving in Iceland is strictly prohibited.
- The applicant is required to prevent all disturbance to the environment and make sure that all litter is removed from the sites.
- If the material is meant for public viewing it must be noted in the video/subtext that permission from the Environment Agency was obtained for the filming/photography.
- The crew should be conscious of other guests on the sites and make sure that filming causes as little disturbance as possible to other visitors.
- An unmanned aircraft should never be flown in close proximity to people. Please take precaution not to disturb people's experience, their safety or personal privacy nor the general peace of the protected areas being filmed.
- It is not allowed to fly the drone above the hut facilities, campground and the hot pool in Landmannalaugar - see attached map for further information.
- According to Icelandic law it is forbidden to fly close to cliffs where birds nest. An unmanned aircraft should never be flown near animals or birds, neither in nesting areas nor during nesting season or any other seasonal time when animals or bird habitats are considered vulnerable.
- Flight time should be kept to a minimum and flight should be avoided during the area's busiest times of the day.
- If the use of unmanned aircraft causes disturbance to wildlife in the area, its use should be ceased at once.
- The conductor of the unmanned aircraft is responsible for the aircraft within the protected area. This includes taking responsibility of any possible risk of harm to people, fauna and nature and leaving no permanent marks on the site in question. Should the aircraft crash, all components from it must be collected and removed from the area.

If the developer causes damage to nature, according to art. 87 in the Nature Conservation Act no. 60/2013, the Environment Agency of Iceland can, according to the Nature Conservation Act, f.e. order the licensee to fix damage to nature and vegetation and/or stop the project.

The Environment Agency of Iceland can according to art. 89 in the Nature Conservation Act no. 60/2013 change conditions of the permit, add new conditions or withdraw the permit in order to prevent damage to nature if environmental conditions change.

According to art 89. in the Nature Conservation Act no. 60/2013 the Environment Agency can withdraw the permit if conditions of the permit are not complied to.

Unmanned aircraft should take off and land in a safe distance from other visitors according to regulation 990/2017 on unmanned aircrafts.

The usage of a drone shall be according to regulation no. 990/2017 on the operation of remotely piloted aircraft (<https://www.icetra.is/aviation/drones/>).

Permission fee:

Environment Agency of Iceland charges a fee for processing applications for permits in protected areas based on Article 92 of Act no. 61/2013 on Nature Conservation. The fee for droneflight for recreational flight in up to two areas is **41.600 ISK** according to art. 29. b. in the agency's tariff no. 1410/2023.
